Q1) High EQ Personality

MS Dhoni

a) MS Dhoni is former Indian international cricketer and one of the most successful captains in cricket history. He led India to multiple ICC trophies, including the T20 world cup (2007), ODI world cup and Champions Trophy. He is known for his calm demeanor and leadership under pressure

b) One notable incident was during the 2011 ICC cricket world cup final, where Dhoni promoted himself up the batting order instead of a more experienced player. Despite immense pressure, he remained calm, took responsibility and led the team to victory.

c) - Self-awareness: Dhoni demonstrated strong self-awareness by understanding his strength and limitations.
- Empathy: Dhoni showed empathy towards teammates by supporting underperforming players and protecting them.
- Leadership: His ability to communicate calmly, manage diverse personality and build cohesion highlights strong social and leadership skills.

d) Dhoni's high EQ significantly contributed to his leadership effectiveness. His calm decision-making improved team performance built long term trust, and earned him respect globally. Public perception views him as a stable, mature and inspirational leader.

e) Dhoni clearly demonstrates high EQ traits which involves effective self awareness, self-regulation, empathy and social skills, justifying his classification as a High Emotional Intelligence personality.

Low EQ Personality

Nick Kyrgios

a) Nick Kyrgios is an Australian professional tennis player known for his exceptional talent and powerful playing style. Despite his skills, his career has been marked by frequent controversies related to on-court behaviour.

b) Nick has been involved in multiple incidents of arguing with ~~umpi~~ umpires, smashing rackets, and verbally abusing officials and spectators during matches. These emotional outbursts often occurred after losing points or facing setbacks.

c) - Self awareness: His repeated emotional reactions suggests difficulty recognizing how his emotions affect performance and public image.

- Self regulation: frequent anger, impulsive behaviour and inability to control frustration indicate poor emotional regulation.

- Social skills: conflicts with officials and negative interactions with audiences reflect limited interpersonal effectiveness.

d) low EQ has negatively influenced Nick's career consistency. Despite natural ability, emotional instability led to penalties, fines and missed opportunities. Public perception often focuses more on his behaviours that his achievements.

e) Low self-regulation, weak self-awareness, and poor social skills are indicators of low EQ. Nick's repeated behavioral patterns align with low Emotional Intelligence, limiting his leadership potential and career growth.

Q2) The comparison between MS Dhoni and Nick Kyrgios highlights the critical role of Emotional Intelligence in personal and professional success. Dhoni demonstrates strong self-awareness, emotional control, empathy and leadership enabling him to perform calmly under pressure, build trust and achieve long-term success. In contrast, Kyrgios often shows poor emotional regulation, impulsive behaviour, weak interpersonal skills which have limited his consistency and overshadowed his talent.
